Project Accountability

Overview

- User logs in via GitHub
- Selects projects to be held accountable, adds mentor
- If mentor accepts, they get notifications on commit
- If user isn't making progress, mentor can "ping" user. Mentor can also comment on commits.
- Can watch on tags v. commits (or user uses branches)

Engagement

- Twitter updates for milestones
- Email or chat talk possibility

First release

- Add mentor
- Comment on commits or tags on a branch
- ruby via heroku

Second release

- Bitbucket support
- Twitter and email updates

Thoughts?
